## High-quality videos - no edit skills needed

Things you had to do in video software are done automatically by Screen Studio.

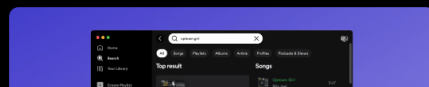

### Smooth cursor movement

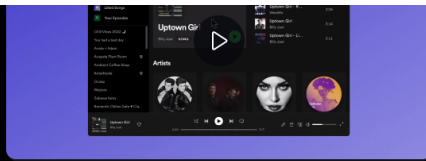

All shakiness of the mouse cursor is removed giving an instant studio-quality feel.

### Zoom & follow mouse clicks

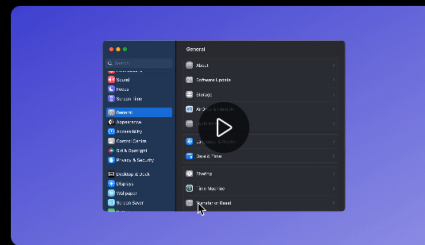

Pick parts of the video you want to focus on the mouse actions and Screen Studio will create all the animations.

### Cinematic motion blur

Every moving piece of the animation will have motion blur applied, making the video feel more smooth and perceived FPS higher.

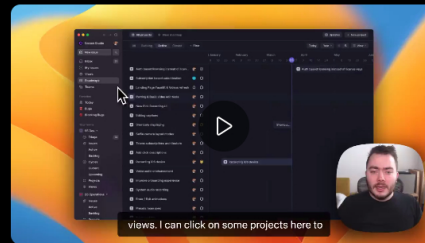

### Wallpaper & window frame

Background padding adds breadth to your video. When publishing to social media - videos will feel less busy and noisy.

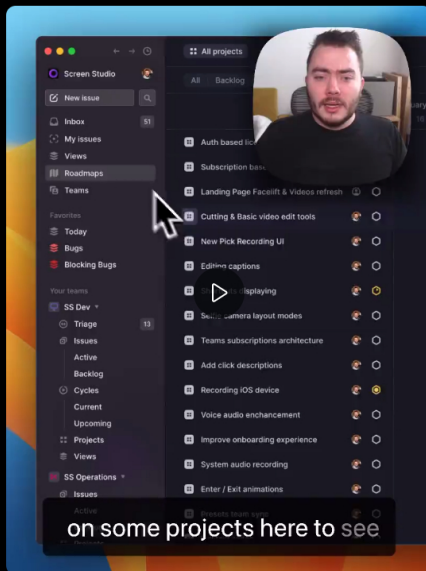

### Change layout and cursor

Record iPhone simulator on your Mac and crop it - all animations will be adjusted automatically. Change your cursor and your mobile app demo is ready.

### Selfie Camera support

Record yourself and switch between you, the screen, or both at once - with amazing animations.

### Automatic size balancing

With one click you can switch horizontal/vertical/square output size and all animations will be re-calculated. It is great for publishing on platforms like Instagram, TikTok, etc.

# Designed for macOS

Built and designed to be fast, reliable and easy to use.

## Meet Screen Studio users

@pie6k The rate of updates to <https://screen.studio> is pretty amazing!

**Martin Harrison**  
@mharrison101

@pie6k Just downloaded it. That's f\*cking insane. Congrats. Super easy to use and amazing results!

**Alfred Lua**  
@alfred\_lua

@pie6k Congrats! Screen Studio looks cool! I have been doing a lot of screen recording and video making (with ScreenFlow mostly because I am familiar with it and paid for an upgraded license recently).
